

2021 Hands-On Bone And Soft Tissue Grafting Course

Featuring Observation of Live Surgery

Speakers: Dr. John Russo & Dr. Bob Gellin

COURSE INFORMATION

Location:

Sarasota, Florida

Russo Seminars Clinical Education Center (Our New Facility)
1704 Bay Road • Sarasota, FL 34239

Dates:

Soft Tissue Course:

June 18-19, 2021

Bone Grafting Course:

July 16-17, 2021

Tuition:

The tuition is \$2200 per two-day weekend course. You may choose to register for either the Soft Tissue Course or the Bone Grafting Course separately.

Register for both courses for a discounted total of \$4000.

COURSE DESCRIPTION

Soft Tissue Course:

This course is designed to give dentists the information needed to make a proper diagnosis of a mucogingival defect, formulate a treatment plan and perform the procedures he or she feels confident performing. Indications and contraindications of free gingival grafts and connective tissue grafts will be given. Other soft tissue management covered will include incision design, partial vs. full thickness flaps, and various suturing techniques. The format will consist of lecture, hands on laboratory exercises on dry models and pig jaws. Live surgical observation in our brand new, state of the art teaching center are now a part of the course.

The classroom will be arranged to allow for social distancing, we will provide individually packaged breakfast and lunch, and attendance will be limited. Our entire teaching center will be thoroughly cleaned for a safe environment for continuing education.

COURSE OBJECTIVES

Soft Tissue Course:

- Understand Miller's Classification of recession defects
- Describe the difference between free gingival grafts and connective tissue grafts
- List factors that affect predictable root coverage for periodontal plastic surgery
- Understand how to perform an internal vertical mattress suture
- Describe indications and properties of various suture materials
- Hands-on lab portion includes detailed step-by-step instructions on performing a free gingival and connective tissue graft

REGISTER EARLY!

Due to social distancing guidelines, attendance will be limited. We recommend that you register early.

www.russoseminars.com or Call (866) 317-7760

Bone Grafting Course:

- Understand the keys to bone grafting
- Describe the properties of different bone graft materials and membranes
- Appreciate surgical anatomy related to each bone graft procedure
- What CBCT anatomy to look for prior to each bone graft
- Classify easy, moderate and difficult bone graft cases.
- Know when to refer!
- Describe a sinus graft protocol of when to do a bump vs. lateral window.
- Know when to use growth factors (PRF and rhBMP2)
- Describe when to choose an autogenous block vs. a block allograft.
- Hands-on lab portion includes detailed step-by-step instructions on performing a block allograft and lateral window sinus lift

COURSE TOPICS

Soft Tissue Course:

- Free Gingival Graft
- Connective Tissue Graft
- Socket Preservation including choosing an appropriate type of bone graft and membrane

Bone Grafting Course:

- Ridge Augmentation
- PRP/PRF and Infuse
- Block Grafting
- Sinus Grafting
